

SCALE BLASTER®

THE WATER SOFTENER ALTERNATIVE

APPLICATIONS

Health Care Facilities

Health Care Facilities

Water Heater Tanks

Scale control on heating coil and tank will allow for the water heaters to work more efficiently resulting in huge energy savings.

Dishwashers

Lime scale buildup in the dishwasher lines and on glassware and dishes will be reduced.

Steamers

Your steamers will require little or no maintenance for scale build-up.

Ice Machines

Scale deposits cause cubes to be cloudy and clogs in the water flow. ScaleBlaster reduces filter clogs, Biofilm and contaminants. Maintenance and downtime are also reduced and equipment lasts longer.

Laundry

Scale deposit control in steam ironing machines, washing machines. You can cut detergent use in half. Cloths and towels will feel softer, look brighter and last longer.

Housekeeping / general cleaning

Huge savings in all phases of cleaning including the bathrooms and in the kitchen - because there is less scale buildup in toilets, showers, nozzles and faucets. Reduced labor and savings in cleaning chemicals will be realized.

Aerators

Aerators will no longer clog up with scale formation, resulting in the elimination of nuisance cleaning and replacement.

Piping system

Your entire building's pipe system will be descaled without any chemicals or re-plumbing. Re-plumbing an entire system can cost tens or even hundreds of thousands.

Healthier water for your customers

Health care facilities' clients tend to be on salt restricted diets. Drinking or showering in water treated with a water softener is not a good idea.

Environmental

Water softeners discharge salt into the water stream, while **ScaleBlaster**[®] does not.
